Thryvon Cotton

2020 Cotton Trait and Ag Systems

2020 Summary

Key Take Aways:

- 1. Thrips efficacy was consistent across moderate to high pressure like the previous two years of testing.**
- 2. The max number of spays savings that we were able to save was 1 with an average savings of 0.66.**
- 3. Significant yield advantage between the Bollgard[®] 3 ThryvOn[™] cotton with XtendFlex[®] Technology and Bollgard[®] 3 XtendFlex[®] Technology cotton under moderate to high tarnished plant bug pressure**
- 4. Plans are to have large scale stewarded Thryvon testing with selected NPE growers across the Carolinas and Virginia**
